# Consent Form for Participants

Centre name: Imperial College London or University of Reading

Study Protocol number: Version 1

**Full Title of Project:** Data-driven integration of emerging technologies to generate a Standardised and Objective Dietary Intake Assessment Tool – **SoDiat Study**

Name of Principal Investigator: Prof. Gary Frost (Imperial), Prof. Julie Lovegrove (Reading)

Please initial box

1. I confirm that I have read and understand the participant information sheet version 2.0 dated 07/06/2023 for Data-driven integration of emerging technologies to generate a Standardised and Objective Dietary Intake Assessment Tool and have had the opportunity to ask questions which have been answered fully.	
2. I understand that my participation is voluntary, and I am free to withdraw at any time, without giving any reason and without my legal rights nor treatment / healthcare being affected.	
3. I understand that sections of any of my existing medical notes or equivalent medical records created for the study may be looked at by responsible individuals from Imperial College or University of Reading, from an NHS Trust or from regulatory authorities where it is relevant to my taking part in this research.	
4. I give/do not give (delete as applicable) consent for information collected about me to be used to support other research or in the development of a new test/device by an academic institution, including those outside of the United Kingdom (which Imperial/University of Reading has ensured will keep this information secure). I understand that the data collected from me in this study will be preserved and made available in anonymised form, so that they can be consulted and re-used by others.	
5. I give/do not give (delete as applicable) consent for blood/urine samples (human tissue) collected from me to be used to support other research or in the development of a new test/device by an academic institution in the future, including those outside of the United Kingdom (which

Imperial/University of Reading has ensured will keep this information secure).	
6. I understand that when completing the Usability of the study tools/techniques questionnaire, direct quotes of mine might be used, in an anonymised form, in scientific journals or other dissemination information documents.	
7. I understand that human tissue samples and/or data collected from me are a gift donated to Imperial College/University of Reading and that I will not personally benefit financially if this research leads to an invention and/or the successful development of a new test, medication treatment, product or service.	
8. I consent to take part in the study title "Data-driven integration of emerging technologies to generate a Standardised and Objective Dietary Intake Assessment Tool".	
9. I give / do not give (delete/mark as applicable) consent to being contacted about the possibility of taking part in other research studies.
